Glossary

Total Cost of Attendance: The total amount (not including grants and scholarships) that it will cost you to go to school during the 2022-23 school year. Total Cost of Attendance includes tuition and fees; housing and meals; and allowances for indirect expenses like books, supplies, transportation, loan fees, and dependent care. For students attending less than half-time, the Total Cost of Attendance includes tuition and fees; an allowance for books, supplies, and transportation; and dependent care expenses.

Total Grants and Scholarships: Student aid funds that do not have to be repaid. Grants are often need-based, while scholarships are usually merit-based. Occasionally you might have to pay back part or all of a grant if, for example, you withdraw from school before finishing a semester.

Total Net Cost: An estimate of the actual costs that you or your family will need to pay during the 2022-23 school year to cover education expenses at a particular school. Net cost is determined by taking the institution's total cost of attendance and subtracting your grants and scholarships.

Work-Study: A student aid program that provides part-time employment while you are enrolled in school to help pay your education expenses. Work-study aid is money that you earn by working.

Loans: Borrowed money that must be repaid with interest. Loans from the federal government typically have a lower interest rate than loans from private lenders. You can find more information about federal loans at [StudentAid.gov](https://studentaid.gov).

Expected Family Contribution (EFC): A number calculated by the federal government that is used by a school to calculate how much financial aid you are eligible to receive, if any. It's based on the financial information you provided in your Free Application for Federal Student Aid (FAFSA). It's not the amount of money your family will have to pay for college, nor is it the amount of federal student aid you will receive. The expected family contribution is reported to you on your Student Aid Report (SAR).

Graduation Rate: The percentage of students who graduate from an institution. This shows students who began their studies as first-time, full-time degree- or certificate-seeking students and completed their degree or certificate within 150 percent of "normal time." For schools that award predominantly bachelor's (four-year) degrees, this is after six years, and for students seeking an associate's (two-year) degree, this is after three years. For students seeking a certificate, the length of time depends on the certificate sought, for example, for a one-year certificate, after 18 months. Additional information can be found at <https://collegescorecard.ed.gov/>.

Repayment Rate: The share of students who have repaid at least \$1 of the principal balance on their federal loans within 3 years of leaving school. Additional information can be found at <https://collegescorecard.ed.gov/>.

Median Borrowing: The median federal student loan debt of undergraduate borrowers who completed. This figure includes only federal loans; it excludes private student loans and parent PLUS loans. It also indicates the monthly payments that an average student would pay on that amount using a 10-year repayment plan. Additional information can be found at <https://collegescorecard.ed.gov/>.

Student Loan Default Rate: The percentage of student borrowers – undergraduate and graduate – who have failed to repay their federal loans within three years of leaving a particular school. A low loan default rate could mean that the institution's students are earning enough income after leaving school to successfully repay their loans.
